

## ASNTR Workshop:

Please remember that attendance at this  
workshop is mandatory for all Travel Awardees

In 2019, the workshop will focus on “Navigating the Role of Industry Partnerships in Academic Research” to help foster career development. We have enlisted workshop speakers from both academic and industry backgrounds with experience in academic/industry collaborations for the development of novel clinical interventions. The chief aim with this workshop is to provide the attendees with insight in to how to develop their science to be attractive to industry partnerships, how to communicate effectively with biotech companies and how to leverage these relationships to help further advance their work.

- Partnering with Industry from an Academic Perspective (Jan Nolta, Director of the Institute for Regenerative Cures, University of California Davis)
- Working with your office of Technology and Innovation (James Kovach, Director of Entrepreneurship and Innovation UC Davis)
- Industry Sponsored Research in an Academic Lab (Robert Mays, Head of Neuroscience Programs and Vice President of Regenerative Medicine at Athersys, Inc)
